1 HISTORY OF DEGEN POV

This is the message from the original creators:

We have been running this project for more than two months now, spending countless hours creating everyday original art, writing interactive stories, making videos...

We tried to push relentlessly regardless of the market. We listened to the community, relaunched to change our supply, adapted our narrative to Base but it was fruitless.

But staying active in this project means too many sacrifices for very little in return. So we made the decision to stop and leave the project to the community.

**DEGEN
POV
SEASON 2**

2 WHY CTO

Gambling with a community is always a nasty thing, leaving them just for a small profit is quite dishonorable.

The team from Degen Studios decided to take action for \$POV after discussing the potential of the meme. Compared to all the PotterObamaShibaBeerStuff out there on the hype train Degen Pov is a hype by its own right or on its own. A unique experience on everything in the first person view of a degen. That means in first person view from all of us! With a strong community everything is possible.

Art has been and will continue to be created in a new style from scratch. We do not want to copy another artists' work.

DEGEN
POV SEASON 2

3 MARKET ANALYSIS AND BRAND POTENTIAL

Degen POV relates to quite a lot of people in the crypto space. The daily life of a degen with all of its ups and downs that everyone knows, might have experienced themselves, or knows someone who knows someone who has.

We expect blockchain technologies to be adopted by more and more commercial entities in the future. Even games with a connection to crypto are on the rise, so have Web3 art and animation series. Big players like Disney and other entertainment companies stretch out their hands to it.

Adult animation is more and more on its path to leave its niche and be adopted by the masses. The Game and Movie markets are huge. Combining that with the cryptomarket is where it starts to become interesting.

4 TOKENOMICS

- Total Supply: 1 trillion tokens (1,000,000,000,000.00)
- 18 decimals token contract

Liquidity Pool (LP)

Contract originally created on Uniswap V3, with the intention to fund future endeavors by its founder. However, as a CTO, we have no access to any original or generated fees, this is 100% community run.

Backing

Degen POV is a meme token, making it backed only by its own investors, there is no other underlying asset backing it.

5 UTILITY AND ENTERTAINMENT

The original intention of the Degen POV token was - apart from the gains - purely entertainment driven. We value that, but to fund the entertainment we are bringing utility as well.

Utility:

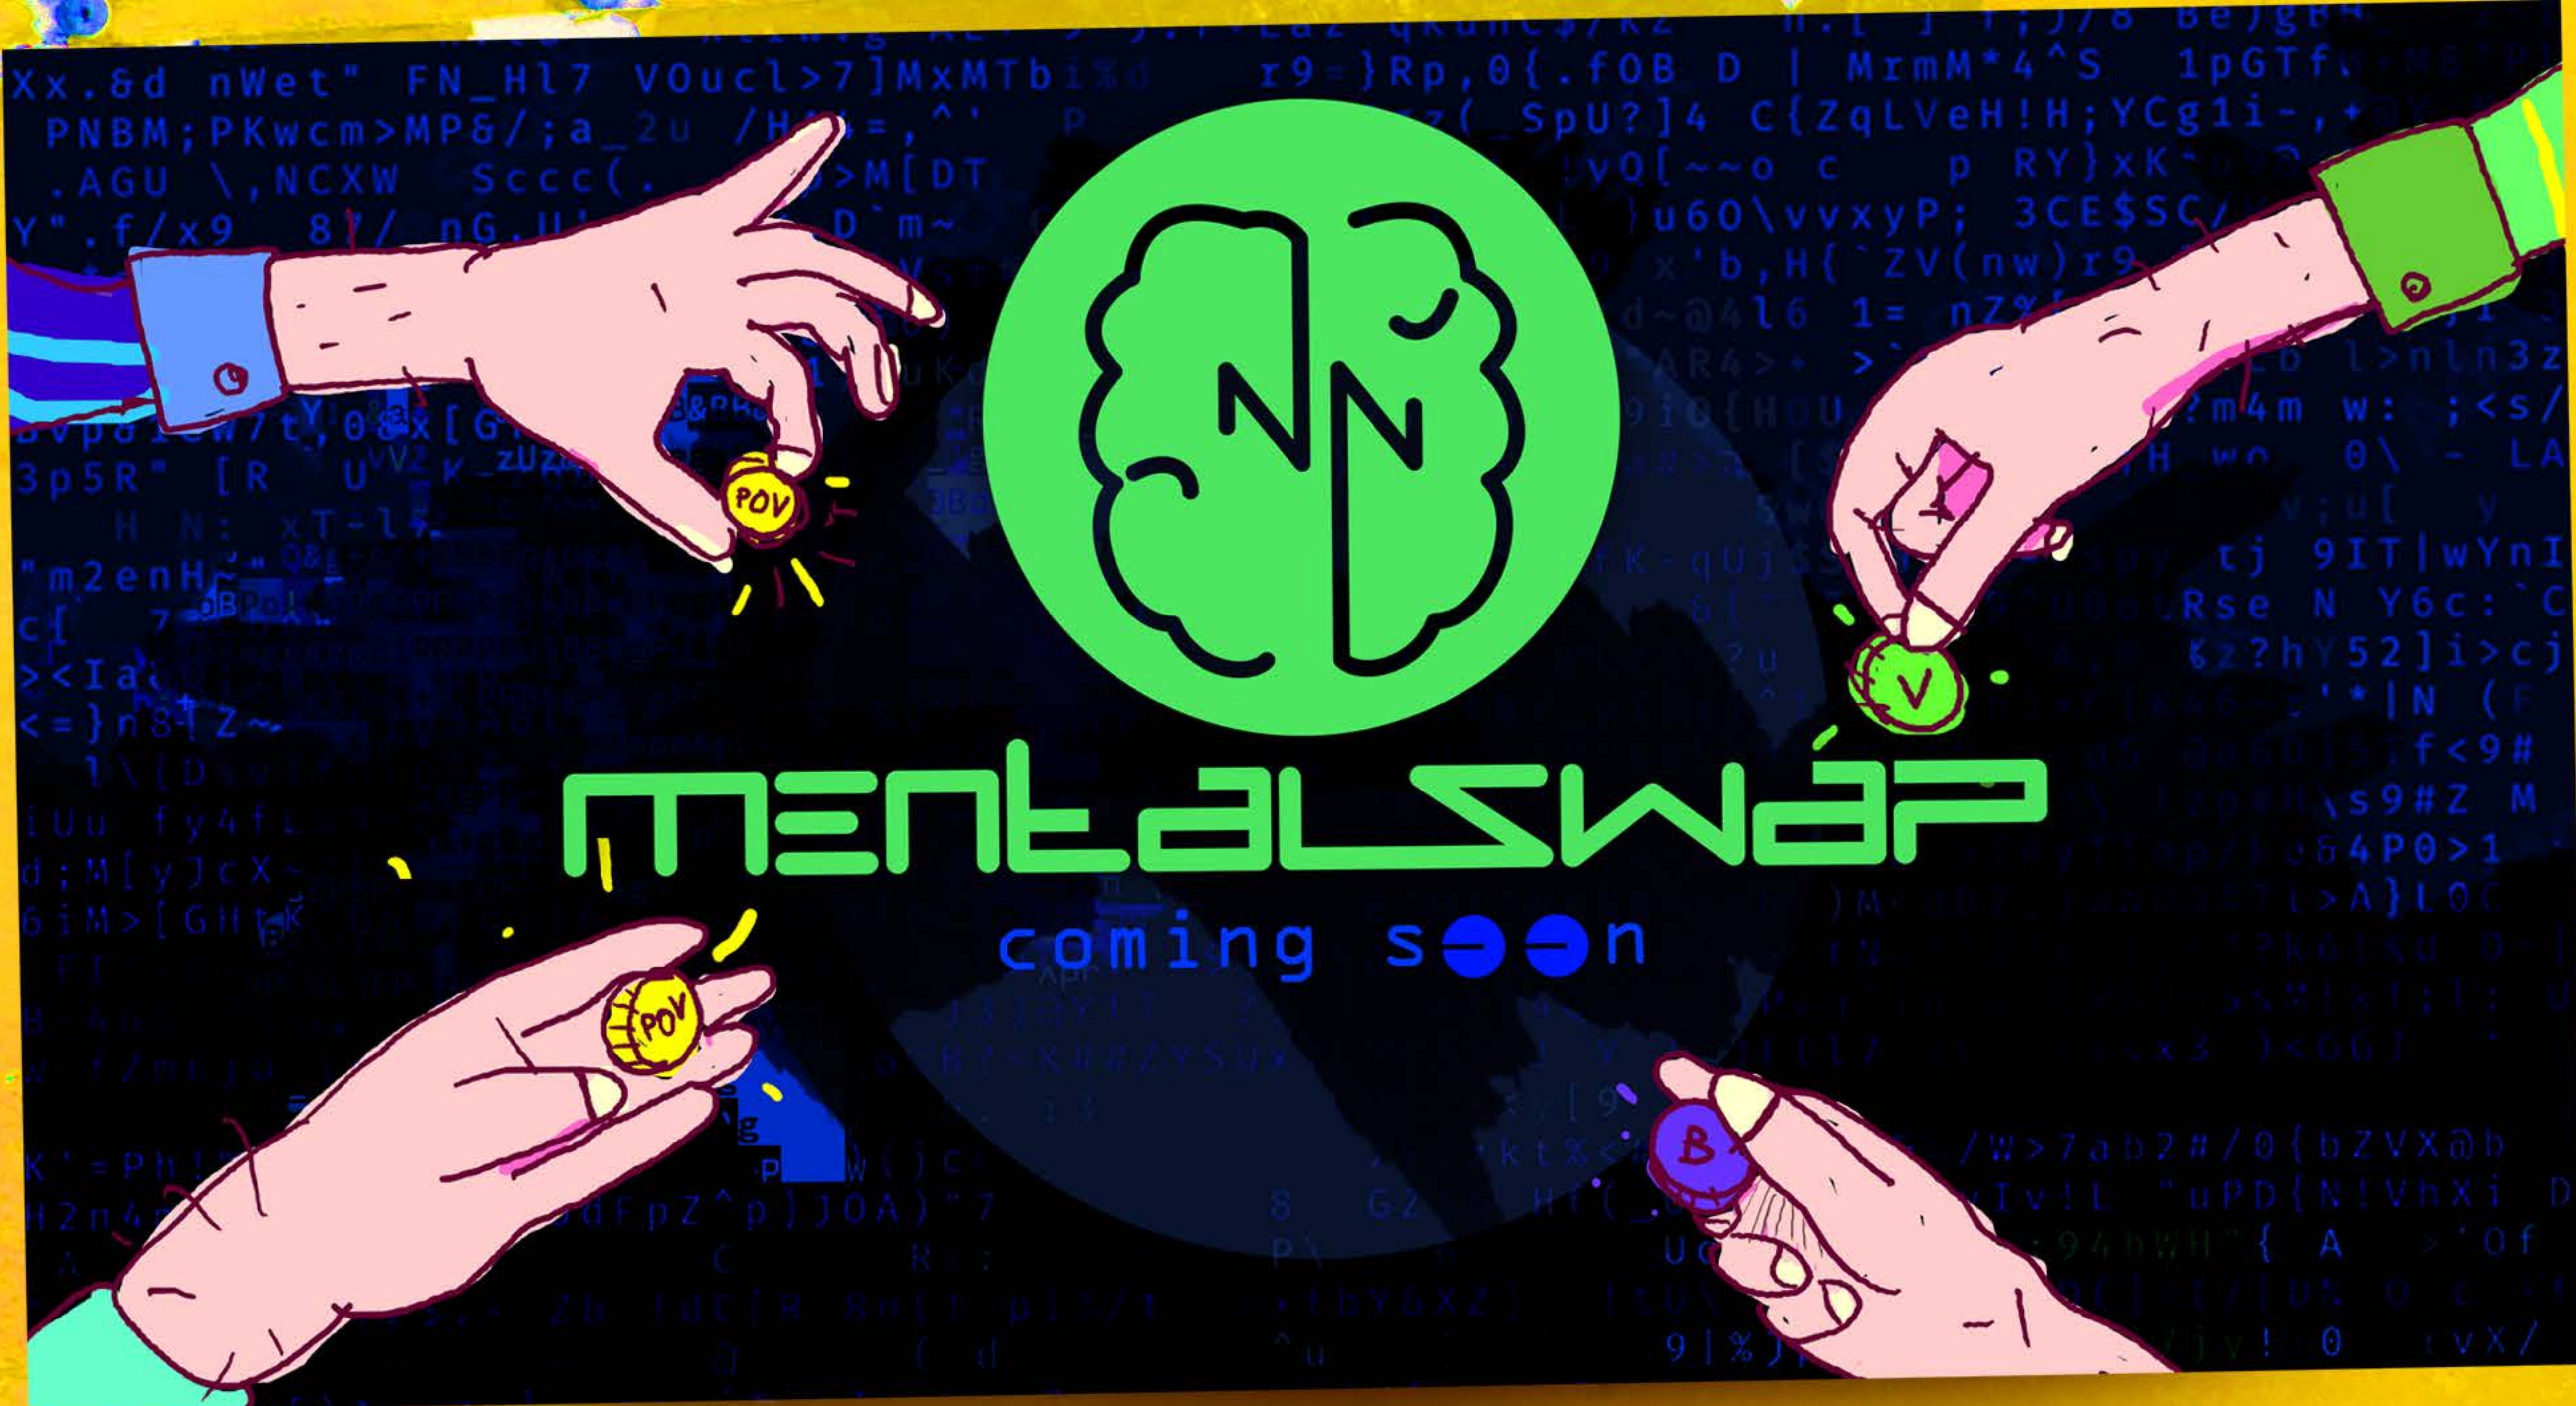

MENTALSWAP
DEGEN POV NFT MARKETPLACE

Entertainment:

ANIMATED WEB3 SERIES
GAME
MERCHANDISE

And of course we will develop more ideas with the community, you!
You always have a say!

MENTALSWAP

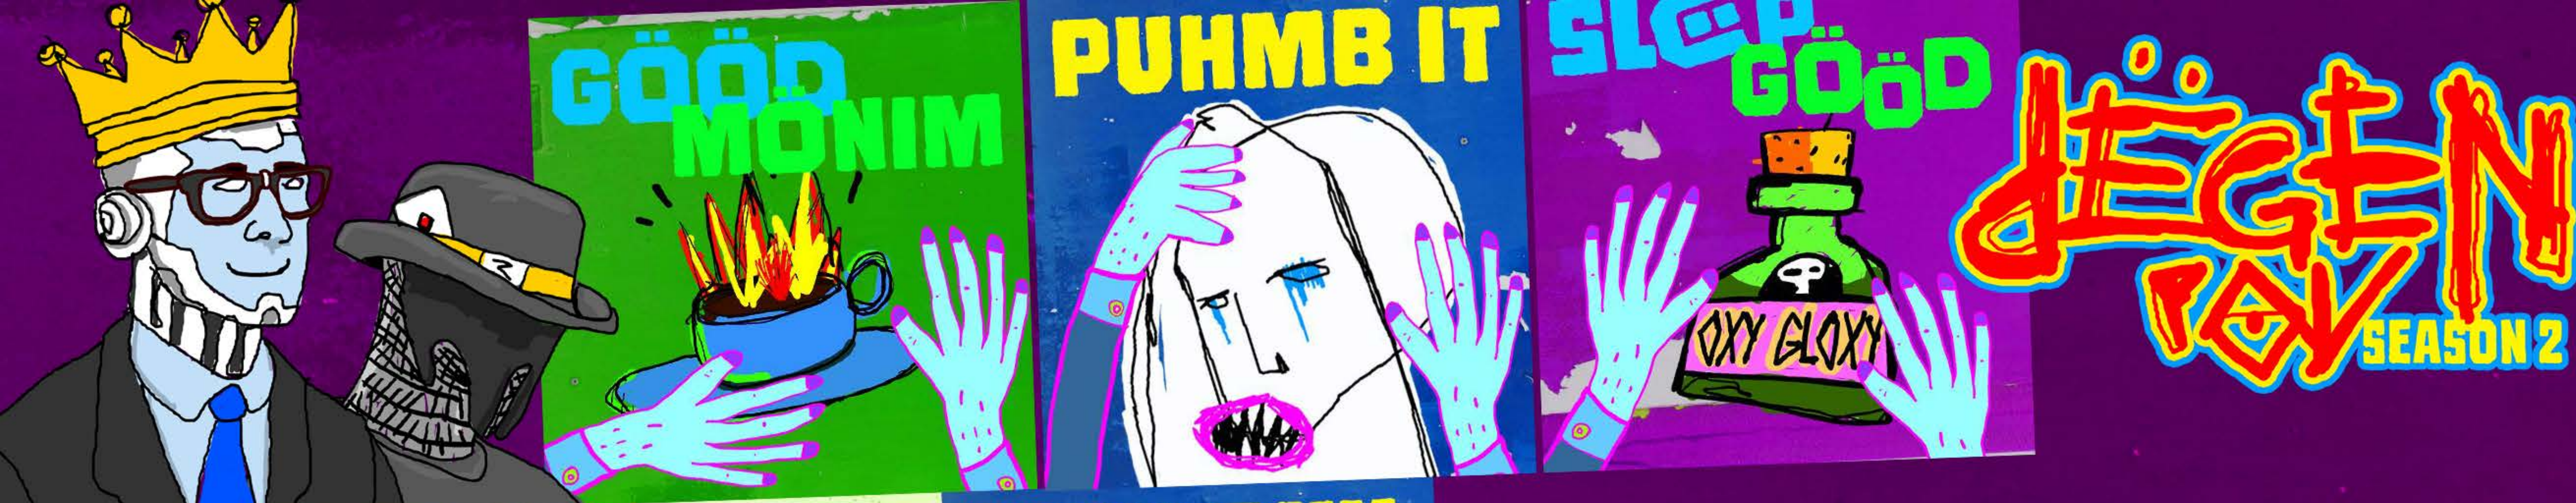

Originally an idea from the Broge CTO, the team from Degen Studios has opted to expand the offering and functionality to more than just that token.

Mentalswap will provide a decentralized exchange platform for anyone who wishes to use it. It will have small fees as most do, those fees are intended to go right back into growing Degen POV and Degen Studios!

Examples of things the fees could be used for are

- Upcoming Projects
- Maintenance
- Marketing
- Airdrops

DEGEN POV NFT MARKET

Our Degen POV Marketplace is a platform intended for anyone to come and publish their own original NFTs and NFT Collections, with the stipulation that the artistic stylings must also be original Degen POV pieces by the associated artist or artists.

There will be a flat fee for every mint, and, like the swap, the fees would be used to expand and improve Degen POV, the NFT Marketplace, and other Degen Studios Projects.

This way people will see we have working utilities, and ongoing creative endeavors, thus creating revenue to maintain a health token market.

DEGEN
POV SEASON 2

Degen Taxi: The Point of View Edition

Inspired heavily by the 1999 game for the Sega Dreamcast, Crazy Taxi. You, a degen, will take the wheel behind your trusty vehicle. You will pick up other mascots of the Base network and race against time to deliver them to their destinations, such as well known crypto events, hangout with other mascots, and, we'll say, „extra-curricular“ activities.

Your view from inside will be a 2D representation in the Degen POV art style of a vehicle dashboard, including a steering wheel, speedometer, even a functional rear view mirror. Who knows, maybe you'll earn yourself some fuzzy dice one day.

Degen Taxi: The Point of View Edition

The mascots are a wild bunch and they love to cause and be part of havoc, so, as you take them to their destinations across a 3D world don't forget to take jumps, run down some street signs and city benches, go the wrong way from what your turn signal says. Doing these things will earn you extra points!

There will be two gameplay modes available to players. A „free“ mode, this mode is free to all who hold an amount of Degen POV tokens (\$POV) to be determined closer to release so as to remain fair to market values. There will also be a weekly ranked mode, players will buy into a pool using their \$POV, a submission fee will be added at the time of this buy in to contribute to long term maintenance, server uptime, reliability, and ongoing development and support.

The ranked mode will have a percentage winning division as follows. First Place 50%, Second Place 20%, Third Place 15%, Fourth Place 10%, Fifth Place 5%. The players who rank from Sixth to Tenth Place will be automatically eligible to participate in the next week's pool for free!

„Degen POV - me in the mirror“ is designed to become a full animated Web3 series with 8 Episodes with 15 minutes runtime each. 2 hours of pure POV!

We will develop together with proven \$POV Holders, or Holders of \$POV NFTs for the whole thing. From start to finish. We intend to bring a full pilot episode delivering to broadcasters and streaming organizations.

What might the show be about? Well, it's about all of us. Our daily uncanny life. Our personalities. What makes a show so special? The story is told in first person view! And the cast is the community!

On the way to that goal we will release small clips on TikTok and Youtube. The Development of the storylines and springboards will be shared via daily posts on X (Formerly Twitter).

**DEGEN
POV SEASON 2**

DEGEN POV MERCH

The idea of \$POV resonates to everyone who likes crypto and pop culture. We will create unique merch together with the community and bring that to the market. Basic things like shirts, caps, mugs and stickers will be included.

6 TEAM

The team assembled in May 2024 to take action for \$broge CTO. The history of that is on the \$broge subreddit.

The following weeks they could make \$broge outperform the market rising from 100K MC to 500K MC. In July 2024 that team formed Degen Studios.

Despite its young age the team together has +60 years of combined experience in the game, software, and animation industry and some of them are crypto pioneers, even experiencing pizza day when it happened.

Another experimental project from the team is \$V (V are money), an adopted narrative of the graphic novel by Allan Moore, which will be put in the utilities as well.

BASED HANGOUT

7 MARKETING

A percentage of the generated net profits of all the utilities being built and merch sales will be used for:

- Create Liquidity Pools for POV to earn fees from transactions
- Artwork contests
- Giveaways
- Collabs and Partnerships

DEGEN
POV SEASON 2

8 ROADMAP

Q2 2024

- Start with the CTO
- Update DexScreener
- Creating new art from scratch
- Several Domains acquisitions

Q3 2024

- Creation of a new narrative
- Release Whitepaper
- Update CMC*, CoinGecko*, Dex Tools*
- New DEX listings
- Daily fresh content on X

Q4 2024

- Release first animated bits on Tiktok & YouTube
- Release Pitch Deck animated series
- Release Mentalswap
- Daily fresh content on X

While empowering, community-driven decision-making comes with inherent challenges, degens navigate market volatility and regulatory uncertainty risks together. And while we embrace transparency, the community needs to understand the skepticism surrounding major shifts in the crypto world.

Trust, but verify! The Degen POV CTO Team, now Degen Studios, have been hard at work to gain and earn the trust of its investors and the market. However, we are not blind to the fact that there are bad actors in crypto. As such, we do not believe anyone should just inherently trust us, or anyone in the crypto market, without thorough research.

8 ROADMAP

Q1 2025

- Conducting the pilot script together with community
- Release NFT Marketplace
- New DEX listings
- Daily fresh content on X
- Release first merchandise products

Q2 2025

- Release Degen Taxi: the first point of view edition
- Release concept trailer for the series
- Daily fresh content on X

Q3 2025

- Pre production pilot episode
- Daily fresh content on X

Q4 2025

- Release pilot episode animation series
- Daily fresh content on X

8 ALMOST LAST WORDS

**DEGEN
POV** SEASON 2

LET'S RIDE THAT BÜS TOGETHER!

“Oh, you can’t help that,” said the Cat. “We are all degens here, I am a degen, you’re a degen”.

“How do you know I’m a degen?” said Alice. “You must be,” said the Cat, “or you wouldn’t have come here”.

TO THE STARS AND BEYOND!
